

CLAIMS

We claim:

1. A basket with extendable legs comprising:
 - a basket;
 - 5 a telescopic leg connected to said basket; and
 - a leg spring disposed within said telescopic leg to bias said telescopic leg away from said basket.
2. The basket with extendable legs of claim 1 wherein:
 - 10 said telescopic leg has a side-wall, said telescopic leg side-wall having a retaining bore therethru.
3. The basket with extendable legs of claim 2 further comprising:
 - a latch pin slidably connected to said basket, said latch pin capable of engaging said telescopic leg side-wall retaining bore.
- 15 4. The basket with extendable legs of claim 3 further comprising:
 - a latch pin spring biasing said latch pin toward said telescopic leg side wall retaining bore.
5. The basket with extendable legs of claim 1 further comprising:
 - 20 a handle connected to said basket.
6. The basket with extendable legs of claim 5 further comprising:
 - a lever slidably connected to said handle.

7. The basket with extendable legs of claim 6 further comprising:

a cable connected to said lever.

8. The basket with extendable legs of claim 7 further comprising:

a cable guide rotatably connected to said basket, said cable guide rotatably

5 connected to said cable.

9. The basket with extendable legs of claim 1 further comprising:

a storage bin connected to said basket.

10. The basket with extendable legs of claim 9 further comprising:

10 a lid hingably connected to said storage bin.

11. The basket with extendable legs of claim 1 wherein:

said basket is comprised of plastic.

15 12. A basket with extendable legs comprising:

a basket;

a telescopic leg connected to said basket, said telescopic leg has a side-wall, said telescopic leg side-wall having a retaining bore therethru;

20 a leg spring disposed within said telescopic leg to bias said telescopic leg away from said basket; and

a latch pin slidably connected to said basket, said latch pin capable of engaging said telescopic leg side-wall retaining bore.

13. The basket with extendable legs of claim 12 further comprising:
a latch pin spring biasing said latch pin toward said telescopic leg side wall retaining bore.
14. The basket with extendable legs of claim 13 further comprising:
a handle connected to said basket.
15. The basket with extendable legs of claim 14 further comprising:
a lever slidably connected to said handle.
16. The basket with extendable legs of claim 15 further comprising:
a cable connected to said lever, said cable connected to said latch pin.
17. The basket with extendable legs of claim 16 further comprising:
a cable guide rotatably connected to said basket, said cable guide rotatably connected to said cable.
18. The basket with extendable legs of claim 17 further comprising:
a storage bin connected to said basket; and
a lid hingably connected to said storage bin.
19. The basket with extendable legs of claim 18 wherein:
said basket is comprised of plastic.
20. A basket with extendable legs comprising:
a basket, said basket is comprised of plastic;
a telescopic leg connected to said basket, said telescopic leg has a side-wall, said telescopic leg side-wall having a retaining bore therethru;

a leg spring disposed within said telescopic leg to bias said telescopic leg
away from said basket;

a latch pin slidably connected to said basket, said latch pin capable of
engaging said telescopic leg side-wall retaining bore;

5 a latch pin spring biasing said latch pin toward said telescopic leg side
wall retaining bore;

a handle connected to said basket;

a lever slidably connected to said handle;

a cable connected to said lever, said cable connected to said latch pin;

10 a cable guide rotatably connected to said basket, said cable guide rotatably
connected to said cable;

a storage bin connected to said basket; and

a lid hingably connected to said storage bin.
